

I Abzweiggetriebe / Multi Shaft Gearboxes

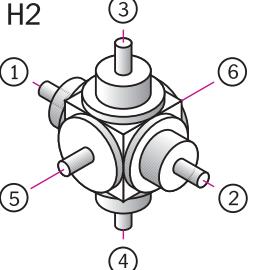

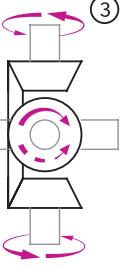

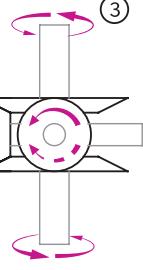

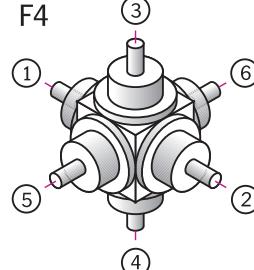

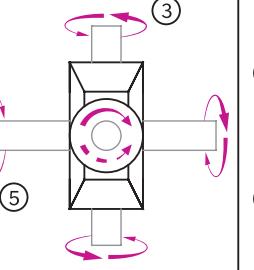

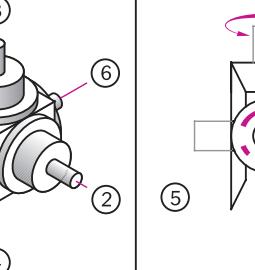

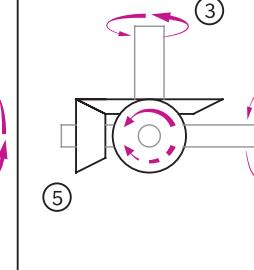

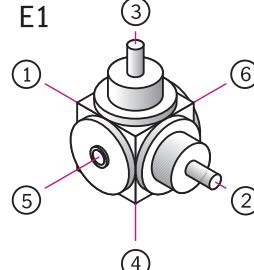

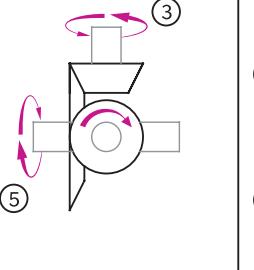

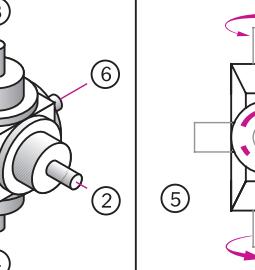

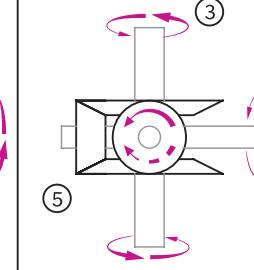

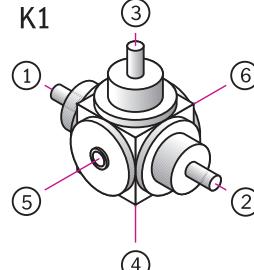

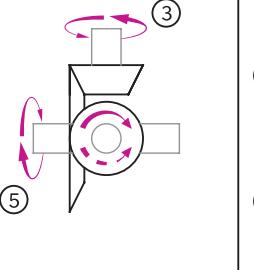

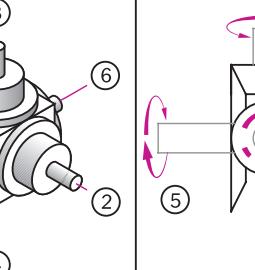

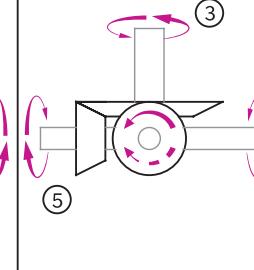

Abzweiggetriebe

Das Baukastensystem unserer Kegelradgetriebe macht es möglich, eine Vielzahl von Bauart-Variationen herzustellen. Die Abmessungen entsprechen den Normalbauarten. Außer $i=1:1$ sind alle Übersetzungen lieferbar.

Multi-Shaft Gearboxes

The modular construction of our bevel gearboxes makes it possible to produce a wide range of design variants. The dimensions are the same as those of the standard versions. With the exception of $i=1:1$, all transmission ratios are available.
