

Diffuse Lighting Series

Dome type light guide Made to order MDP120-1000S

An indirect light. Illumination is reflected off the interior of the dome, resulting in 360° of even and diffuse illumination. Suitable for applications with high reflection and halo problems.

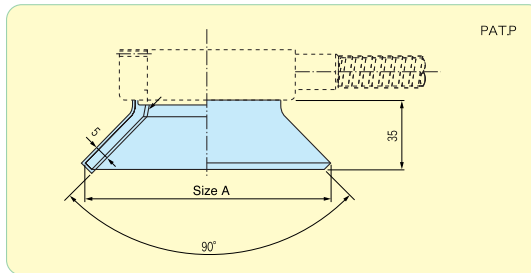

*Compact products (outside diameter of ø54 and ø80) can be manufactured.

Diffuse lighting adaptor MD series MD02~06

For use with standard ring light guides, it reduces reflection and halo effects by illuminating from the inside surface of the dome.

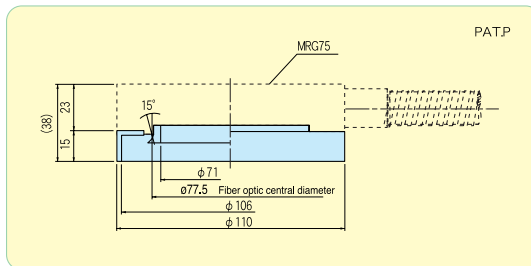

* Ring light guide MRG series is sold separately.

Product name	A (mm)	Compatible ring light
MD-02	101	MRG31-
MD-03	121	MRG48-
MD-04	115	MRG53-
MD-05	126	MRG61-
MD-06	140	MRG75-

Reflection type diffuse lighting adaptor MDC-06

Light output from the ring is directed by a reflection ring to the object. The result is a diffuse and uniform light suitable for laser mark recognition applications.

* Ring light guides MRG75-1000S/1500S are sold separately.
